WINNERS MEETING SUMMARY

The Winners Project was initially founded by Prof. Arnaud Wattiez with Dr. Rudi Campo. It was established in conjunction with his clinical fellows with the concept of creating a platform where high quality endoscopic training and education could be freely accessible to all, on both a national and international scale.

The Winners Project has continued to push boundaries, and exists in many different forms, notably the Winners Corner, the Winners Bingo and the Winners Meeting. The Winners Project has been well aware of the growing need and demand for a recognised, structured educational programme incorporating both theoretical and practical skill sets.

The annual Winners Meeting developed as a natural progression in a bid to create a unique meeting far removed from the classic congress models. The concept was to bring together young people with a common interest in minimal access surgery where ideas could be exchanged and experiences shared, whilst, at the same time, establishing strong foundations for the next generation of endoscopists.

About Winners Meeting

The annual winners meeting developed as a natural progression in a bid to create a unique meeting far removed from the classic congress models.

The concept was to bring together young people with a common interest in minimal access surgery where ideas could be exchanged and experiences shared whilst at the same time establishing strong foundations for the next generation of endoscopists.

Why Delegates Attend This Congress?

- Keep up-to-date on the Latest Trends in Minimally Invasive Surgery
- Meet & interact with the industry colleagues and experts
- Providing broad connection to the highest scientific, clinical and social exchange
- Surgical knowledge and clinical career development

Why This Meeting is the Best Place for Our Partners and Exhibitors?

- Create the brand awareness of company
- Promote surgical techniques through education
- Showcase high-quality products and equipments
- Expand opportunities to Surgeons & Healthcare Professionals

WINNERS MEETING - PRESIDENT'S MESSAGE

I am delighted to invite you to the 10th Winners Meeting, one of the most important international events in the field of minimally invasive gynecologic surgery.

This is the 10th anniversary, a great milestone for us, after so many successful events these 10 years around the world, the Winners Meeting returns to Porto Heli Greece, where everything started.

The Winners Project is an innovative international platform focused to provide training and share experience in the field of minimally invasive gynecologic surgery different from the classic congress concept. We want participants to meet the experts and be able to share the knowledge and skills of modern gynecologic endoscopic surgery.

All these 10 years, young gynecologic surgeons are the soul of this meeting, and the feedback is great. For 3 days the participants will be able to learn anatomy, surgical techniques, innovative solutions, test their skills, etc. Also, at the famous Winners corner, young doctors will be able to present videos from their work at a very relaxed environment.

This year we will have a great program covering almost all fields of endoscopic gynecologic surgery with the active participation of many distinguished professionals focused to teach and share knowledge.

Finally, Winner's meetings are well known for the fun factor. Porto Heli is a world famous resort and in a particularly beautiful period of year, at the beginning of Greek Summer, will make all of us to have an unforgettable time next to the sea.

Looking forward seeing you in Porto Heli, Greece to enjoy a great scientific event and have a good time together 10 years after, same place, same success!!

Prof. Pantelis Trompoukis

Associate Professor of Obstetrics & Gynecology at the European University Cyprus & Director at the Department of Gynecologic Endoscopy, IASO group of hospitals, Athens, Greece.

Congress President

PANEL OF FACULTIES TO BE ANNOUNCED SOON

GESEA Certification on June 20th

Full details to be confirmed soon..

GESEA EDUCATIONAL PROGRAMME

The GESEA Educational Programme is a structured educational and assessment programme for gynaecological endoscopy. It trains and certifies knowledge and psychomotor skills prior to surgical competence, and provides an educative path to achieve a diploma in minimally invasive gynaecological surgery.

GESEA offers standardisation of endoscopic surgical education and assessment

The educational programme is structured in three proficiency levels which progressively build on each other. One must fulfil the criteria for each level before gaining access and progressing to the next level.

Proficiency levels of the GESEA Educational Programme:

- Level 1 GESEA Level 1 Certificate
- Level 2 GESEA Level 2 Certificate
GESEA MIGS Diploma
- Level 3 Subspecialty level
GESEA Expert Diplomas
